

## Student association Daedalus

With 800 bachelor and master students, teachers and employees, study association S.G. Daedalus is where all disciplines of Industrial Design Engineering come together. The association and its divisions are there to help the students' development, to take the students' interests at heart and represent these interests.

## Industrial Design Engineering

The educational programme of Industrial Design Engineering (IDE) focusses, with 3 years bachelor and 2 years master, on designing products and services. Students focus on topics such as design, production techniques, appearance design, ergonomics, sustainability and management. This knowledge of a wide variety of subjects makes an IDE-student an engineer who can come to a complete, creative solution for a design problem in corporation with all other professionals. Technical product drawings, injectionmould-design, re-design of the casing of a precision machine, package design, and application development are merely a few examples of what an IDE-student is capable off.

## What can we deliver?

S.G. Daedalus is the connection between IDE-students and business. All IDE-students are affiliated with us and we have contact with all divisions of the University of Twente. Therefore we can deliver the following:

- **Potential new employees and trainees:** direct contact with students that are being educated for the field of work within your company.
- **Contact with the University:** The university has a lot of knowledge and facilities, S.G. Daedalus is the ideal first connection.
- **Refreshing ideas:** Students often have an unexpected vision on problems and are able to come up with legitimate professional solutions that were previously unseen.

## Possibilities for collabaration

S.G. Daedalus can be the link to among other things the above, through the following:

- **Brainstorming sessions and working out cases:** If you are searching for an innovative solution to a problem, this is the ideal way of using the unexpected ideas of our students.
- **Lunch lectures:** Giving a short lecture about your company during the lunchbreak to our students.
- **Excursions:** Our students visiting your company.

Next to the the options above, we have a yearly symposium, we like to organise workshops and we have study tours. Apart from that we also have other options for sponsorship. We are always open for suggestions and we would like to discuss the possibilities with you. If you would like to know more about the corporation possibilities with S.G. Daedalus, please do contact us and ask for the partnership committee.
